SUMMARY

Detail-oriented Data Science student with hands-on experience in data cleaning, exploratory data analysis, and building interactive dashboards using Tableau, Python, and spreadsheets. Skilled at transforming raw datasets into actionable insights to support data-driven decision-making.

TECHNICAL SKILLS

Languages: Python, SQL
Libraries: Pandas, NumPy
Visualization: Tableau, Google Sheets, Excel
Tools: VS Code, Git, GitHub
Concepts: EDA, Data Cleaning, Dashboarding, Statistical Analysis

PROJECTS

Uber Trip Analytics Dashboard [GitHub]

Tools: Python, Tableau, Excel

- Analyzed 50,000+ trip records to identify demand patterns, high-revenue routes, and ride preferences across time and geography
- Cleaned data in Python — currency normalization, time/distance conversion, duplicate removal, and location label standardization
- Built interactive Tableau dashboard visualizing hourly revenue vs. trip volume, category-wise fares, and top-performing routes

Blinkit Sales & Outlet Dashboard [GitHub]

Tools: Tableau, Excel

- Designed end-to-end Tableau dashboard tracking sales performance, outlet distribution, and product category trends
- Cleaned and structured raw Excel data; built multi-chart views on outlet type, item fat content, tier-wise and year-wise performance
- Delivered insights on high-performing outlet types and product segments to support inventory and expansion strategy

Retail Sales Analytics Dashboard [GitHub]

Tools: Tableau, Excel

- Conducted collaborative EDA on a retail dataset to visualize sales trends, regional performance, and product-level profitability
- Prepared data in Excel — handled missing values, category mapping, and revenue aggregation across regions
- Contributed to project planning, data cleaning, and visualization design; collaborated via Git and GitHub

Google Sheets Data Analysis Dashboard [GitHub]

Tools: Google Sheets

- Built interactive dashboard using pivot tables and dynamic formulas (VLOOKUP, QUERY, ARRAYFORMULA) for structured EDA
- Applied data cleaning, conditional formatting, and chart-driven storytelling to communicate findings in an academic project

EDUCATION

Bachelor of Technology in Artificial Intelligence 2024 – 2028
Newton School of Technology, Rishihood University CGPA: 6.087/10.0

Intermediate (Class XII) 2021 – 2023
Haripal Gurudayal Institution 72.0%

Matriculation (Class X) 2019 – 2020
Bahirkhand Girish Institution 95.0%

ACHIEVEMENT

- Construct Hackathon 2025** — Built and launched *Cognify* (Career Guidance Platform) using React and Node.js, mapping student interests to career paths; shipped MVP on Product Hunt within a 12-day timeline as sole developer
