

PROFESSIONAL SUMMARY

Aspiring Data Analyst | Skilled in data visualization and analysis using Python, SQL, Excel, and Tableau | Experienced in building interactive dashboards, performing exploratory data analysis, and deriving actionable insights | Exploring machine learning and GenAI concepts including LLMs, RAG, and agent-based systems while strengthening problem-solving skills

EDUCATION

Bachelor of Technology (Artificial intelligence)	2024 - 2028
Newton School Of Technology, Rishihood University	Grade: 8.33/10.0
Intermediate (Class XII)	2023 - 2024
S.G.M.P.S	Grade: 85.0%
Matriculation (Class X)	2021 - 2022
Delhi Public School	Grade: 92.0%

PROJECTS

Retail Sales Analysis (Github) (Demo)	April 2026
- Tools: Python, Pandas, NumPy, Tableau - Performed data cleaning and exploratory data analysis on retail dataset to identify sales trends and patterns - Analyzed product categories, customer segments, and regional performance to evaluate business outcomes - Developed an interactive Tableau dashboard to visualize key KPIs such as sales, profit, and category-wise performance - Implemented filters and interactive visuals for dynamic data exploration and improved data storytelling - Identified high-performing products and low-profit areas, enabling data-driven business decision-making	
Diabetes Predictor & Agent (Github) (Demo)	February 2026
- Tools: Python, Pandas, NumPy, Scikit-learn, LangGraph, LLM, RAG - Developed a machine learning model to predict diabetes risk using medical attributes such as glucose level, BMI, and age - Performed data preprocessing, feature engineering, and model training to improve prediction accuracy - Integrated a Large Language Model (LLM) with a Retrieval-Augmented Generation (RAG) pipeline to provide accurate, context-aware explanations using external knowledge sources - Designed an AI agent using LangGraph to enable reasoning, memory, and interactive user communication - Built an intelligent system that combines predictive analytics with explainable AI, enhancing user understanding and decision support	
Superstore Sales Dashboard Analysis (Github) (Demo)	February 2026
- Tools: Excel - Performed data cleaning and preprocessing on Superstore retail dataset to ensure data consistency and accuracy - Analyzed sales, profit, and order trends across regions, categories, and customer segments Created interactive dashboards in Excel using pivot tables, charts, and slicers for dynamic data exploration - Identified high-performing products and regions, along with areas of low profitability - Generated actionable insights to support business decision-making and performance optimization	

CERTIFICATIONS

SQL(Basic) HackerRank (Link)	December 2025
Certified in SQL (Basics) with hands-on experience in writing queries and data retrieval.	
JavaScript (Basic) HackerRank (Link)	April 2025

Certified in JavaScript basics, including core language concepts and practical application in web development.
Python(Basic) HackerRank ([Link](#))
Basic Python proficiency certified, showcasing my ability to work with core language feature

July 2024

SKILLS

Computer Languages: Machine Learning, Python, TypeScript, HTML, CSS, JavaScript, SQL

Data Tools: NumPy

Software Packages: Pandas, Matplotlib, Next JS, MySQL, Next.js, React, Node.js, Excel, Express JS, MongoDB

Soft Skills: Teamwork

Others: LLM, Analytics, LangChain, LangGraph, Tableau

EXTRA-CURRICULAR ACTIVITIES

Successfully qualified the **Internal Round of SIH 2024**, where our team developed an innovative solution and showcased collaborative and technical skills.
